

SERIOUS & ORGANISED CRIME ANALYTICS

Wynyard's Serious and Organised Crime Analytics solution has been designed to detect, stop and help solve serious crimes by rapidly identifying intelligence for use by law enforcement personnel.

Wynyard's Serious and Organised Crime Analytics solution is a configuration of the Wynyard Advanced Crime Analytics Platform.

SERIOUS AND ORGANISED CRIME ANALYTICS IS USED BY:

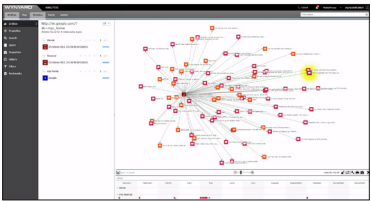

SERIOUS AND ORGANISED CRIME ANALYTICS HELPS:

- Investigators to manage all of their data sources and identify patterns, anomalies, persons, locations and events of interest.
- Reduce the amount of time and resources required to prevent and solve serious crimes or disrupt organised criminal networks.
- Surface actionable intelligence to support operations and enable better and faster decision making.
- Investigate and prosecute organised criminal networks through effective multi-agency cooperation and data sharing.

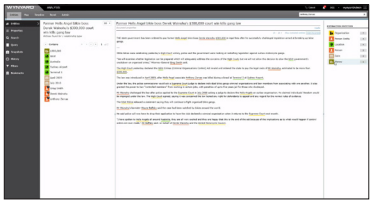

SOLUTION HIGHLIGHTS:

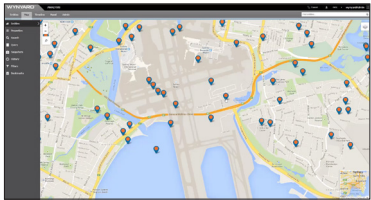

Powerful analytics capabilities
Use built-in tools and algorithms to combine and analyse case data with wider intelligence holdings including open source information.

Network, link, mapping and timeline visualisations
Gain an easy to understand and complete picture of the case by visualising all the relevant entities, events and relationships.

Automatic entity extraction and link analysis
Process witness and victim statements and then automatically extract the entities and map the relationships between them. This helps to quickly find the relevant information without needing to read each document.

Search and query capability
Powerful search and query functionality allows the rapid surfacing of new information by searching and connecting data from multiple sources.

Serious and Organised Crime Analytics enabling intelligence-led investigations
